Clemson College, S. C. Wednesday April 10, 1929

No. 24

## CLEMSON AERO CLUB MONOPLANE SUCCESSFUL IN TEST FLIGHTS AT GREENVILLE AIRPORT

### Veteran Pilots Fly Little Plane and Compliment Builders

Flight tests with the Clemson Aero Club monoplane are being made by pilots of the Williams Flying Service at the Greenville airport. The little plane was carried to the Greenville port during the Spring holidays where the Aero Club is conducting tests as guests of the Williams Flying Service. Last Saturday morning the entire Clemson Club was carried aloft in a formation flight of machines belonging to the Cody Circus and the Williams Company.

Several preliminary flights have been made in the Clemson monoplane by pilots Kateley and Heick of the Williams organization. Mr. Kateley is a veteran pilot of some twelve years experience, and he has stated after several short hops in the Clemson ship, that it is a fine little machine of good design and flying qualities, although the small two-cylinder motor does not seem to have sufficient power to allow the machine its best performance. It is the opinion of the Greenville pilots that the little ship is amply strong to carry a motor of twice the power now used, and that a larger motor should be secured if possible.

The little monoplane has attracted so much attention at the Greenville port that it must be kept behind locked doors when a large crowd gathers at the field, to prevent damage to the machine.

All test flights are made without previous announcement to avoid the presence of a large group of spectators.

(Continued on page 5)

## CLEMSON MEN READ PAPERS BEFORE ACADEMY

### Nine Papers to be Presented by Members of Clemson Staff

Nine of the papers to be presented at the annual meeting of the South Carolina Academy of Science in Columbia today are by members of the Clemson faculty and staff.

In the Chemistry section, Dr. R. N. Brackett and B. F. Robertson discuss "Determination of Mineral Nitrogen in Mixed Fertilizers"; Dr. Peter Carodenus presents "Effects of Temperature Upon Copper Solubility and Electrical Conductivity of Milk"; A. H. Meyer will discuss "Soils of South Carolina"; and J. H. Mitchell will present a paper on "Iodine in the Waters of South Carolina". Dr. F. H. H. Calhoun leads the Geology group with "Variation in the Value of South Carolina's Mineral Resources". In Zoology, P. A. Berry will discuss "Biological Studies of Aphidius Polygonophis"; and C. O. Eddy and W. H. Clark will present a paper of "The Mexican Bean Beetle". Dr. T. S. Buie, in the Botany section, will discuss "Fruiting of Cotton"; and R. A. McGinty has a paper on "The Effect of Various Containers on the Growth of plants".

A large number of members of the faculty are members of the Academy, and Dr. Calhoun is on the executive council of the body.

## TAPS BALL WILL BE COLORFUL EVENT ON NEXT FRIDAY NIGHT

### Masquerade and Collegiate Atmosphere will Hop to Rudy Brown's Music

Friday night, April 12, promises to be the high spot in the College social life of the month. That night brings to the cadets the annual "Taps" Ball which has always, heretofore, been one of the best dances of the year and the one Friday night should not fall below expectations, for the different committees have been working several days now making preparations.

This dance usually has a larger attendance than any of the year, because it is the only masquerade ball held at Clemson during the year. An unusually large number of girls have already been placed and it is expected that there will be even a greater number placed the last few days before the dance. So, there need be no worry about the girls, for there will be plenty of them.

The "Gym" will be decorated so as to present an unusually attractive setting. The color scheme will be black and white and will be carried out in somewhat the customary fashion. A large number of silhouettes have already been secured and will be placed about on the walls of the "Gym" to help brighten up the decorations.

The music will be furnished by Rudy Brown. That should be enough to assure any cadet that the dance will be good, for all who have heard these boys play know that they are plenty hot and plenty good. This orchestra has played at a number of Clemson dances and has always made a hit.

## OLD CLEMSON MAN HEADS CONSTRUCTION

### Q. B. Newman, Class of '01 Supervises Construction of Five Cutters

Q. B. Newman, who was graduated from Clemson in 1901, supervised the construction of five of the newest cutters which have been built for the Coast Guard service. The new cutters embody the most important developments in marine engineering since the advent of electric propulsion, according to the manufacturers. One main and two auxiliary turbine electric sets supply power for lighting, pumping, radio, and all other purposes direct from the main engine. The vessels are each 250 feet over all in length, and of 2,000 tons displacement. At the time of their construction, Captain Newman was Engineer in Chief of the Coast Guard Service. He is a native of Pelzer and graduated from Clemson in Mechanical and Electrical Engineering.

## DR. W. D. WEATHERFORD GIVES SERIES OF FOUR LECTURES TO STUDENTS

### Famous Speaker, Known as Student's Friend, Brought Here by Y. M. C. A.

Through warm personal contact, an dthorough sane, straight-forward, stirring addresses, Dr. W. D. Weatherford, "The Student's Friend", president of the Y. M. C. A. Graduate School, won the hearts of Clemson men and stimulated them to fight for higher levels of living during his visit on the Clemson campus April 7th and 8th.

DR. W. D. WEATHERFORD

The four public addresses which Dr. Weatherford brought to the Clemson students and the people of the community were as follows:

(Continued on page 5)

## SPEAKER SELECTED AT ELIMINATION CONTEST

### John Galloway to Represent Clemson in Intercollegiate Oratorical Contest

On last Friday Night, April 5, the elimination contest was held for the purpose of selecting the speaker to represent Clemson in the Intercollegiate Oratorical Contest which will be held on April 26 at Winthrop College. John C. Galloway, speaking on "Youth at the Crossways", was winner of first place, and J. F. Higgins, speaking on "What Price Education", was given second place. The other speakers delivered their orations well and deserve much praise. The judges for the contest were Professors Martin, Brearley, Eaton, Dr. Buie and Rev. Crouch.

All of the nine male colleges of the state are members of the Association. The object of the Association is to develop closer and more friendly relations between the colleges of the State; and to foster and promote the cultivation of oratory.

John Galloway is studying Architecture and, incidentally, this is the first time an architectural student has represented Clemson in the Oratorical Contest. Mr. Galloway is also a member of the executive committee, but since he is to be speaker this year Cadet F. B. Farr will be acting executive committeeman. These two men represented Clemson last year, with Galloway as committeeman and Farr as speaker.

## CLEMSON GLEE CLUB PERFORMS FRIDAY

### Acclaimed as Good All Over State—Clemson Glee Club will Present Offering in Chapel Friday Night

Judging from the deluge of invitations that followed their recent tour, the Clemson Glee Club Artists scored an unusually brilliant success. They were greeted with packed houses at Clover, Rock Hill, Winthrop, Winnsboro, Lancaster, Limestone and Seneca. Already, since the trip, they have had to turn down invitations from eleven different places. This is indeed a compliment to them and their achievements.

The program which these artists chose to render consisted of three parts, embodying both classical and popular selections. The first part was composed of classical choruses and solos. Excellent vocal solos were rendered by F. C. Ducker, F. H. Hendrix and J. T. Goff, and violin solos were given by "Kid" Carter. Part two was ably taken care of by The Jungaleers, the 'Harmanizin' Fools' from Ye Olde Palmetto State'. They were plenty hot and drew round after round of applause. Eclipsing the preceding parts came part three. It was made up of popular selections. These selections, particularly gripped and enthralled the audiences.

These men will appear here next Friday night. If you want to enjoy a real treat come out and hear them.

## TAU BETA PI PLEDGES NINE MEN

### First Ten Percent of Junior M. E., C. E. and E. E.'s Pledged

At a recent meeting of the South Carolina Alpha chapter of Tau Beta Pi, honorary engineering fraternity, the following men were pledged: E. S. Hudgens, H. W. Dorset, J. M. Prim, M. L. Geddings, W. C. Snyder, J. J. Butler, L. P. Thomas, L. T. Leitner, and Prof. W. W. Klugh, a member of the first class to graduate from Clemson.

These men, with the exception of Prof. Klugh, are members of the Junior class and comprise the first ten percent of the men taking M. E., C. E. and E. E. according to scholastic standing.

The initiation will take place in the afternoon of April 26, and immediately following there will be a supper at Starr for both new and old men. T. G. Hamner, '28, T. J. Hendrix, '27, and D. D. Gillespie, '28, members of the old local honorary society will also be initiated at this—and probably others who have not been heard from as yet.

It is the aim of the chapter to offer membership to old Clemson men who attained the required scholastic standing while attending school. At this time plans are on foot to start work with the Class of '26 and work back to the first class picking those men who are found to be eligible. This will probably take two or three years as it necessitates the looking up of each man's scholastic record for the four years he was in college.

## JUNIOR-SENIOR DATE SET FOR MAY 10

### Banquet, Reception and Dance Planned to Provide All With Good Time

The date for the Junior-Senior banquet is very near at hand. Preparations are being made for May 10, which is the date set. Committees have been appointed, and all are expecting to make this the most outstanding social event at Clemson. More cadets and girls are expected than ever before, and a jolly good time is being prepared for all.

Already the decoration committee has begun its work. There will be seen the blending of extremely elaborate colors in the decorations. No efforts will be spared in making this the season's best.

The dance will begin immediately after the banquet, and there will be plenty of the South's most beautiful queens present to make it surpass all others of the year. Abundance of good music will be furnished by the very best orchestra. The dance will last until the late hours of the morning.

There will be a reception given at the Y for those not desiring to attend the dance. There will be plenty of entertainment and it will be fascinating.

## "GOAT" McMILLAN AWARDED TROPHY

### Newman Trophy Presented to Tow-Headed Half Back

The Newman Trophy, an award inaugurated at Clemson this year, has been presented to Covington "Goat" McMillan, forward passer, deluxe and half-back extraordinary of the football team.

This trophy, presented by Carter Newman, of Greenville, former Clemson track and basketball star, is a handsome silver cup which is awarded the member of the football squad who shows the most improvement during the season. Under the regulations prescribed for its award, members of the football squad nominate three candidates for the honor, and the coaching staff selects the player who is to receive it. O. D. Padgett, captain-elect, and Bob Jones, Captain-elect of basketball and potent end of the football squad, were the other men nominated.

Goat McMillan gained wide prominence during last season by his phenomenal forward passing as well as thrilling dashes on his own account. In 1927 he was considered a good average halfback, but last season his performance was so improved that he easily won a place on the All-South Carolina composite eleven and received wide acclaim throughout the Conference. He is a member of the Junior Class.

## ARCHITECTURAL AWARD

In the competition in Architectural design in the Junior Class H. L. Boyd and H. W. Whitlock placed first and S. B. Earle, Jr., S. R. Power and H. E. Woodward were placed second. The problem was "A Meeting Hall for Architects."

# The Tiger

"HE ROARS FOR CLEMSON"

Founded by the Class of 1907 and published weekly, during the college season, by the Corps of Cadets of Clemson College.

Entered as Second Class matter at the Post Office at Clemson College, South Carolina.

## EDITORIAL

Every college graduate who attains any degree of success in traveling life's itinerary, or who promotes activity at his various clubs and social engagements, will continually experience requests for innumerable types of toasts, speeches and addresses. Not only is a definite course in public speaking offered right here at our very door, but there are also numerous opportunities in the various scholastic activities to develop a marked proficiency in this indispensable element of business and social life before we leave friendly grounds. College is probably the only station where we will enjoy having educated friends correct those defects in our voices and mannerisms which will propagate "up-the-sleeve" criticism in the commercial world where every man is struggling for his own existence. Those things which are said behind our backs after we leave college, that could have been corrected with a little timely thought, are what cast perplexing yet discouraging shadows across our efforts.

Among those who were fortunate enough to receive a thorough training in the art, will always be found that speaker, who misjudges human nature and overlooks the essentials of a spell-binding speech. Most students abhor the idea of having to stand before a group to express a few thought or facts. Usually this is due to a misconception as to true values. John knows that everybody in the audience is scrutinizing him as if he is a convict. He thinks his listeners are there to throw bombs at him if he makes a mistake.

Yet, in finality before him are only human beings like himself. If they notice a mistake, they regard it lightly, forget it, and respect him and his speech as much as if it had been flawless. The story is told of a prominent speaker whose memory failed him in the midst of his speech. Did he get embarrassed? No, he calmly told his audience to pardon him for a second until he could look over his outline which he had set to one side. Then he remarked, "This happens in the best of families". And so it does, and his speech went on as before. We are all human, and if we do our best we should not be afraid of what people think about us.

There are three things which can make speaking in public a pleasure instead of a dreaded ordeal. When you step on the platform, at least, have a fair conception of your mode of treatment of the topic. Extemporaneous speeches are fitting for the experienced orator, but the beginner must climb the ladder step by step. It is also a good plan to speak before the family circle or before your roommates. This may make your heart flutter at first, but finally it will eliminate embarrassment and create confidence. Lack of confidence has sounded the

death knell for many energetic speakers. It was Daniel Webster who said, "Confidence is a thing not to be produced by compulsion". So it is. The only method for gaining grace and ease is to speak in public as often as the portal is opened to you. Choose your subject from a field that is familiar to you. If it falls beyond the range of your knowledge, do a little research to acquaint yourself with the most interesting facts. In securing this additional material it is unwise to confine the study to the facts circumscribing your particular topic; extend its scope beyond the vital information so as to create a speech that is authoritative, as well as to give you something for future use. It is always desirable to choose a subject or develop a central idea in terms of the type of audience that is to face you and thru a psychology that will appeal to their emotions.

While you are in college making speeches remember that half the things you think matter, don't, while half those you think don't matter, do. It is wise to steer clear of the bumps, but don't travel fifty miles in order to get around five of rough road. If you have an inclination to fear public speaking or if you feel that you are not as good as the other fellow, don't forget that, "Ever alluring, forever unattainable, gleams Perfection—that bright impossibility. Yet since the world began, there have been men who set Perfection as their mark and strove ceaselessly toward it. The midday sun—no less! their target. Only from such high endeavor has high attainment been achieved". With these elements in mind while you have teachers and friends close at hand, you should endeavor to grasp your opportunities, to finally speak in public influenced by the same ease that dominates in the conversation with a friend or comrade.

The platoon of Juniors who have been drilling every evening after supper are to be commended on their desire and efforts to present a snappy outfit, both at camp this summer and to the annual inspection officers.

This cause deserves the support of every member of the Junior class and it is regrettable that there is a comparatively small percentage of the members of the class engaged in this drill. Of course, there are a few whose duties prevent them from participating, but this number is small compared to those who have no real reason for not engaging. There should be keen competition for places in this platoon.

Since it is in no wise a compulsory drill, and there is no means of enforcing discipline, every man who volunteers should do so willingly

ly with the intention of drilling and obeying commands just as if he were in the regular army. Nothing can be accomplished, and no good can result from the drill if interest lags. That is, unless every man drills his best, with a real desire to make a good showing for his class. The drill will amount to naught. Too much play during the drill period will ultimately defeat the very purpose for which the drill was started. Drill of this nature requires concentration and undivided thought.

This drill should be given for the inspecting officers next week and since there will be four more evenings in which to prepare before this time, every junior should be present at every period.

We of the Junior class naturally feel that we have one of the best

classes that has ever been at Clemson. We are desirous of leaving behind us an enviable record in every phase of college activity. Winning first honors at camp this summer for Clemson is only a part of this desire. The Junior class is not lacking in spirit, it is just that some of us have failed to give this matter serious thought, so let's get behind this drill, and put it over big.

## EASTER PAGEANT

An Easter Pageant, "The King Triumphant", was given in the auditorium of the Y Sunday evening, March 31. Some fifty children who attend the Week Day Church School of the Presbyterian Church made up the cast. The pageant represented children of Palestine who lived in the days of Jesus Christ. Their conversation centered in this Man who had raised one of their little group from the dead, Jairus' daughter.

## "Good Smoke!" Says Hubby "O. K." with Wife

Brooklyn, N. Y.  
August 4, 1928

Larus & Bro. Co.,  
Richmond, Va., U. S. A.

Dear Sir:

Going to take the pleasure and drop you a few lines to say that my favorite tobacco is your Edgeworth. I have been a user of it for the last eight years and find it's the only tobacco for a real good smoke.

For the last five or six months I have been trying several other kinds but I find Edgeworth is the only tobacco for me.

If I am smoking any other brand my wife will tell me, as she likes the smell of only Edgeworth. When I'm smoking others she opens all windows and doors.

The reason for writing this letter is that I had a card party last night, and most all of the party asked me what kind of tobacco I used.

So I told them Edgeworth.

Yours very truly,  
A smoker of Edgeworth  
(Signed) E. E. Boisvert

OPEN SUNDAYS

## L. C. Martin Drug Co., Inc.

P. S. McCOLLUM, Manager

## VESPER SERVICE

Vesper Service was held in the Methodist church Sunday night so as to have a greater seating capacity for the audience. Dr. W. D. Weatherford was the speaker for the evening. He gave a very interesting and inspiring talk on the subject "The College Man's Battle." Dr. Weatherford opened his address by giving a very vivid description of the land of Palestine. According to his description of this Holy land, there are such great differences in climatic conditions existing in this section of the country that the sun can be shining with hot rays in one portion of Palestine while it will be snowing within a distance of fifty miles. In this land it rains for six months of the year and stays fair for the other six months.

Dr. Weatherford said that we needed more men here at Clemson who can set up new and high moral standards—that is, men who can forget themselves and work for the good of others.

Dr. Weatherford closed his talk by encouraging us to give more of our time to religious work here at Clemson.

O. R. MAGILL

## REGIONAL EXECUTIVE TO SPEAK AT "Y" VESPERS APRIL 14

O. R. Magill, Executive Secretary of student Y. M. C. A. work in the South, will speak in the "Y" auditorium on Sunday evening, April 14th, at six o'clock.

Mr. Magill comes from a rich experience in China where he has been the executive of student work. Prior to going to China, Mr. Magill had been student secretary at V. P. I., had also taken graduate work there and was a mean stepping half on the football team. Mississippi A. & M. claims him for the larger part of his undergraduate days. However, Maryville College started him out as a freshman. Since returning to America, Mr. Magill has "polished up" at Columbia, and hence brings to the South a rich and helpful experience.

Most wives hope their daughters will marry more wisely than their mothers did.

## UNION SERVICE

All the churches of the campus combined for their services Sunday morning so as to give everyone here the chance of hearing Dr. W. D. Weatherford, President of the Y. M. C. A. Graduate School at Nashville, Tennessee, speak.

Special music was prepared for the services. Professor Fernow added to the music by playing the violin and cello.

The subject of Dr. Weatherford's sermon was "The Meaning of Reli-

gion." He proceeded to describe this term, religion, by stating a few things which it could not mean. His final definition for the word was "one's having the right attitude toward his fellowman." Dr. Weatherford preached a very interesting sermon and brought out a number of points which will be of great value to us if we but heed them.

Next to making a sale the most pleasant experience is collecting the money.

## Freshman and Sophomore Councils and New Cabinet Have Meeting

The men on the Freshman and Sophomore Councils and the new Cabinet met in the Ladies room of the "Y" Sunday night after Vesper Service to discuss with Dr. Weatherford different topics pertaining to "Y" work.

Dr. Weatherford listed four things which he considered a man had to pay the price of when he tried to become a leader. These were as follows:

1. The struggle toward living a Christian life.
2. The cost of standing for moral issues.
3. Working hard enough to learn what Christianity really is.
4. Belief in other people.

No idea is worth much unless a first-class man is back of it.

## BIBLE STUDY CLASSES HOLD UNION MEETING

A meeting of all of the Bible Study classes combined was held in the auditorium of the "Y" last Thursday evening. The purpose of the meeting, which was the last one of the year, was to hear a report from a representative of each company as to the number of members enrolled in the Bible Study class on his Company and the average attendance each Tuesday night. Company D took first place with an average attendance of about thirty-five.

Mr. G. H. Aull, a member of the Advisory Board of the Y. M. C. A., had charge of teaching this class. Mr. Aull taught the Freshman Bible Study class on K Company last year, and it seems that he has developed that art of attracting the boys to the weekly meetings, for his class last year was large and had almost a perfect attendance. When called upon to make his report Thursday evening, Mr. Aull highly praised the cadets of D Company, for the splendid work which they had done during the Semester.

A great deal of interest has been created in this work this year, and, as a result, a great many thoughts have been brought out which the members of the classes will carry with them through life. That interest has been shown in this work by teachers as well as students is proved by the fact that men come from as far as Walhalla every Tuesday evening for the sole purpose of teaching one of the Bible Study classes for one hour.

H Company took second place with an average attendance of about twenty-five. Mr. Holtzendorff taught this class, and the members of his class feel that the time which they spent listening to him discuss the lesson was time well spent.

Most of us fear our friends more than our enemies.

## CLUBS AND SOCIETIES

## CALHOUN

Members of the Calhoun Literary Society attended one of the most enjoyable meetings of the year last Tuesday night.

The meeting was called to order by the president, T. R. Wannamaker was asked to lead the society in prayer. The president then called for reports from the program committee and treasurer.

J. C. Galloway started the program with a short speech. F. B. ("Gator") Farr then gave the oration with which he won the State Oratorical Contest last year. This concluded the program, but the society was treated to a pleasant surprise, for, instead of the usual adjournment, refreshments were served. This treat was possible through Captain Harcombe's kindness.

The next meeting of the Society will be on Tuesday, April 9, and visitors are invited to attend.

## PALMETTO

The meeting of the Palmetto Literary Society last Thursday evening was largely devoted to the election of last term officers.

The society was called to order by the president and led in prayer by the chaplain. The secretary then called the roll and read the minutes of the last meeting. H. N. Jenkins was submitted to the society for membership and given the oath.

The following officers were elected: President, J. F. Hawkins; Vice-president, R. F. Nalley; Secretary, J. W. Patterson; Treasurer, L. O. Clayton; Corresponding Secretary, J. C. Childers; Parliamentarian, T. W. Webb; Literary Critic, H. L. Shands; Chaplain, F. W. Cannon; and Sergeant-at-Arms, E. R. Kelley.

After the election of the officers there were some very interesting impromptus delivered by C. P. Hogarth, F. B. Pollard and D. C. Hudgens. a report by the literary

critic, the society was adjourned. the next meeting will be held Thursday night just after long-roll. Visitors are welcome.

## NATURAL HISTORY

"Where did I come from?" asked the rose bud.

## THE MELTING POT

8,000-Mile Geology Excursion Part  
of V. P. I. Summer Quarter

Camping and study is the combination which is being offered in the geology course which will be given by Dr. Roy J. Holden as part of the Virginia Polytechnic Institute summer quarter. The trip will cover 8,000 miles in twenty states, Canada, and Mexico.

The itinerary has been made with the view of studying geology in the field and to visit portions of America which afford outstanding scenic beauties. The course, which is to receive full college credit, will consist of lectures and field study. The lectures will be given in camp with talks in the field whenever suitable geological features are presented.

—The Virginia Tech.

### Collegiate Flying Clubs

"An average ten hour flying course costs in the neighborhood of three hundred dollars," says Robert B. Bell, president of the Harvard Flying Club, in the April College Humor. "The chief value of a flying club is that it allows a student to pile up flying time at a reasonable cost, cutting the price of a course nearly in half."

The Harvard Flying Club, Incorporated, is the senior college flying organization in the country. Its first plane, flying only six months of the year since 1926, has flown nearly four hundred hours, and many pilots have been trained and licensed, all without serious mishap of any sort. This has been largely due to the success with which it has solved the main problems which will face every college flying organization; namely, the problems of finance, and the problem of operation.

The primary aim of any flying club should be to keep its plane or planes in the air; to pile up flying time and to train pilots. That this may be done, some standard organization and well defined rules are needed. It is hoped that this article will be of some interest and value to those contemplating the formation of flying clubs in other colleges and localities.

### A New One For Our Own To Pull

George H. Dern, Governor of Utah, has signed a bill passed by the legislature prohibiting the display of billboards in that state advertising cigarettes or any other forms of tobacco.

—Orange and White.

### Madrid University Students Revolt

Several shots were fired and a number of students were slightly injured recently in a continuation of demonstrations against the dictatorship of General Primo de Rivera by students of Madrid University, principally those in the schools of law, medicine and science. No serious consequences followed the shooting and the student injuries were confined to bruises.

The doors of the university were closed. When several small groups of students forced their way in they met a strong force of police. Publication of sentence of expulsion of a student at the industrial engineering school who was forbidden to enter any other in Spain or to occupy any public office had angered the other students. Most of them refused to attend classes and walked the streets singing popular songs against the dictator.

The police surrounded the university buildings and patrols in the central streets of the capital dispersed any group which attempted to form. Two detectives who entered the medical school in disguise were roughly handled. The police arrested the leading agitators in their homes with the intention of sending them to small towns in the provinces. Many parents of students are sending their sons away from Madrid.

—The Plainsman.

### FOR YOU TIGERS

All the Base Ball Team that goes to Atlanta to play Georgia Tech will get reduced rates for this trip on shoes repaired and clothes cleaned and pressed.

I am with you Tigers. Beat Tech. Let 'em Down Easy.

MRS. PEARL TAYLOR, Manager

Friend—What did you do when you found out your husband was leading a double life?

Wife—I redoubled.

First Cook—What do you do with yourself now since the ice man is out of a job?

Second ditto—Well, the man who collects installments on the electric refrigerator ain't such a last sort!

An all-seeing Providence has come to humorists. Just as Coolidge retired to private life, a Mexican revolution started.

Captain (in shipwreck)—Women and children first!

Mat—Yes, but which are the women?

Call me a doctor.

Why?

I've just graduated from medical school.

When better monies at college will write home?

Game—Huntin'?

They—Nope—golfin'!

Absent-minded Banker (to his love)—Darling, let's merge.

Old Mountaineer—I never tho't Steve's boy would amount to nothin' but he shot a revenue today.

### Stocracy

Hi-hat—Back from shooting in Scotland? He had some wonderful shots.

Dim-wit—What'd ja shoot?

Hi-hat—Pheasants.

Dim-wit—Certainly do give the lower end a rotten deal over there.

### Och, Aye!

English Lord—I should sufficiently significant that, oats are eaten by men, in England they are fed to

Scotch—Right. An' that for the fine horses in and the fine men in Scotland.

### Insult

Whar you-all gwine in? Fine to git dat doctah ed up my operation wid lead.

### Ought To Be a Law

eeper—How many times kissed-to-night?

twice. Remember when I answer the door-bell.

### Service

Baron—Tell the sliding tromplayer to blow in this direction my soup is too hot.

### Incredulous

Bill—Gried to kiss you what do?

him I had on Kiss-Proof

he do then? the label was false.

### One On Us?

is now a doctor at

you better than

is that?

seem more like one

### Realism

The kind old lady came up to the bright young urchin that was playing in the mud puddle beside the roadway and spoke to him: "What pretty red roses you have in your cheeks," she said.

"Naw," replied the kid, "that ain't no roses; that's chawin' tobacco."

### Credo

From life's book of tears and laughter,

I've gained this bit of lore;  
I'd rather have a orning after  
Than never have a night before.

I hear that the dean of women is going to try to stop necking.

I should think she would, a woman of her age.

When they pulled the Professor, half drowned, from the water, he spluttered: "How exasperating! I've just recalled the fact that I can swim!"

Then there was the case of the burglar's son who was born with a silver spoon in his pocket.

New Boy—What are all those trunks doing over there by the door?

Second dumb 'un—Oh they belong to the chorus girls.

New Boy—Let's go to another show.

Give me a sentence with 'anticipating' in it.

He spent the night in drinking, gambling anticipating.

Methuselah's Mother—Certainly I won't pay fare for this child—he's only 245 years old!

The only way you can tell that it is the fourth of July in Chicago is by looking at the calendar.

Mable—why so sad, honey?

Laura—That silly clump that I was going to sue for breach of promise wants to marry me now!

1.—You know that Richleigh must have money.

2.—So must I. Introduce me to him.

He—I am burning with love for you.

She—Oh, don't make a fuel of yourself!

Arthur—Darling, I love you so much I can hardly sleep.

His Fiancee—Oh, Arthur, if you loved me enough, you wouldn't be able to sleep at all.

### Flourishing Industries

Teacher—What is Boston noted for?

Johnny—Boots and shoes.

Teacher—Correct. And Chicago?

Johnny—Shoots and booze.

### Perfectly Killing

Desperado—Halt! If you move you're dead.

Student—My man, you should be more careful of your English. If I should move, it would be a positive sign that I was alive.

Auto Salesman—Our cars no good? Why we're selling them by the dozens!

Prospect—I'm not surprised—how much are they a dozen?

Stories about movie stars getting married should end with commas.

## GROTESQUES GRACE ENGINEERING BLDG.

### Ten Leering Faces Gaze On All Entering Building

A very interesting bit of art that has been worked out in the design and construction of the new Engineering building are the ten grotesques which occupy the spaces between the third story windows on the north, or front side of the building. Being life-size bas-reliefs of human heads carved from limestone blocks of only about one foot square, they are not particularly noticed by any except the keenly observant. However, they add very much to the appearance of the building and their absence would leave several conspicuously detracting blank spaces on the wall.

Bearing emblems characteristic of each department of engineering, these fantastic exaggerations smile down in unholy glee or frown with devilish intent upon all who pass by, and seem to issue a flagrant challenge to the unwary student to meet and overcome the obstacles in his chosen profession.

The following is a description of each, the emblem being held in the hands or underneath the head, in order of its position on the building starting at the left of East end:

- 1—Mechanical Engineering—gear wheel and piston of engine.
- 2—Physics—triangular prism with beam of light passing through and dividing.
- 3—Academic—book and quill.
- 4—Radio—ear-phone, strap over head and wires below.
- 5—Electrical Engineering—dynamo and electric flashes.
- 6—Civil Engineering—target on surveyors rod and telescope of a level.
- 7—Structural Engineering—I-beam and steel angle.
- 8—Drawing—triangular and T
- 9—Art—palette and brush.
- 10—Architecture—capital of a column.

The clay models for these figures were made by Professor R. E. Lee, of the college faculty of the class of '25, and J. B. Burts, and carved by the H. R. Hupfman Co., of Atlanta.

### DR. W. D. WEATHERFORD ADDRESSES STUDENTS

(Continued from page 1)  
"The Meaning of Religion."  
"The Courage of Leadership."  
"What They Say About Student Life."  
"The College Man's Battle."

In these addresses, Dr. Weatherford placed the utmost emphasis on reality in religious life, pointing out the fact that the Christian fellow is the normal fellow, rather than the abnormal. Men were warned against being spineless conformists—one of the crowd. "The hypocrite of today," stated Dr. Weatherford, "is not the fellow who pretends to be better than he is, but the man who pretends to be worse than he is."

Another fact on which Dr. Weatherford placed emphasis was that of a student's responsibility of leadership. One's influence, good or bad, is ever radiating, and hence determining the contest of others. "The upper-classman," said the speaker, "who leads an under-classman astray assumes a tremendous responsibility." On the other hand, the man who has the moral courage to live a four-square life on the campus is a tremendous force for good. An incident was cited when the football team on which "Dad" Elliott was playing was about to meet the final opposition of the season. The game would determine the championship of the "Big Ten". A few days before the game, the coach, in talking to the squad, told his men that they could win provided one man on the opposition be put out of the game early in the contest. "Get him out, and get him out early," he said. Doubtless there were members of the squad who did not favor the

crooked tactics, but they didn't have the courage to say so. Suddenly, the captain of the team and one of the outstanding players on the squad rose to his feet. "Coach," he commenced, "if those are your tactics in the final game, you can count me out." One by one other members of the squad joined "Dad" Elliott in his stand for clean athletics. Likewise, there are numbers of Clemson men who are ready to join you in a stand for clean living if you will but stand for those things which you know to be right.

Standing as a tribute to Dr. Weatherford is the Clemson Young Men's Christian Association building. It was through the efforts and influence of Dr. Weatherford that the initial gift of fifty thousand dollars was secured from Mr. Rockefeller. Dr. Weatherford also received from Mr. Rockefeller gifts for the Georgia Tech., Mississippi A. & M., and N. C. State Y. M. C. A. buildings. For nearly thirty years now he has been giving his life to

help students of the Southland. Consequently, in view of these facts, and after coming in contact with him personally, we are agreed that he is indeed deserving of the title "The Student's Friend."

## COURSE IN TECHNICAL WRITING OFFERED

### Students in Textile Branches May Study Technical Writing Now

Clemson College now offers a new course in technical writing especially adapted for students in chemistry, dyeing, and other branches of textile work.

This course is the result of the demand in the industry for men able to express opinions, results of tests, etc., in writing. The ability to write concisely, clearly, and to the point is of constantly growing

importance in all branches of industry today and training along this line is often necessary to obtain and hold many Government and other very desirable positions.

This course is one of many under development at Clemson in order to equip graduates to meet the rapidly changing and developing demands of the industry of today and tomorrow. It is open to both junior and senior students of the Departments of Chemistry and Textile Chemistry and Dyeing, as well as any others who have completed the other necessary subjects. It will be given under the direction of Dr. Chas. E. Mullin, who is widely known as a technical writer.

### CLEMSON MONOPLANE SUCCESSFUL IN TEST FLIGHTS (Continued from page 1)

tors. The aero club has received many compliments from aviation authorities on the workmanship and flying qualities of the machine.

many saying that it is the best product they have even seen not to have been designed and built in a factory, and practically everyone was surprised that the pilots requested no change to be made in the plane, either before or after it was flown in the preliminary tests, thus showing that the distribution of weights and surfaces was correct throughout the little craft. The pilot is so located that a change in weight of pilots does not effect the balance of the machine.

Continued flight tests are to be made at the Greenville field, with an attempt to secure more power from the motor now used. The club has an arrangement with the Williams Flying Service regarding the exhibiting of the machine for public demonstration, which will not be announced until a later date.

"Plenty of folk have a good aim in life, but a lot of them never pull the trigger."

## The Duke Power Company Turbine-Generators

*Where do young college men get in a large industrial organization? Have they opportunity to exercise creative talent? Is individual work recognized?*

**T**HE largest steam-turbine generator units to be installed south of the Mason-Dixon line are now being built for one of the most unusual organizations of its kind in the world. The Duke Power Company is famous for the efficiency of its power plants—and for the fact that its operating profits are distributed largely to charity.

At a horseshoe bend in the Catawba River in the heart of the Piedmont Carolinas the Duke Power Company is building a generating plant which, if present plans are carried out, will be the largest of its kind in the southeastern United States. The ultimate capacity will probably be 600,000 horsepower. The first two units, which Westinghouse is now building, each are to have a generating capacity of 55,000

kilowatts. They will develop 150,000 horsepower.

By operating at practically full capacity during the entire 24 hours of the day, letting the company's hydro-electric plants handle variations in the quantity of power required, the new units will furnish the means to reduce current costs to a minimum.

The large jobs go to large organizations. Westinghouse holds a strong appeal for young men of enterprise and genius because it almost daily provides contacts with outstanding developments in the electrical field.

# Westinghouse

## SPORTS

## MICHIGAN HERE FOR TWO GAMES

## SPORTS

At last we won a baseball game, or was it a "comedy of errors"? More errors than baseball, at that. We're not kicking but from what we expected—why we're still waiting to see—It hasn't been shown yet by the team. But the season's just started, maybe there hasn't been time to straighten out the boys yet, maybe we'll show some old time form soon. It had better be soon or else it'll be too late for the Inter-collegiate baseball season only lasts for a few short weeks.

Remember we're watching for developments in the games with Michigan here Wednesday and Thursday, come on boys, snap into it, play baseball, and please for the benefit of the entire cadet corps show some old Tiger spirit on the field, we know you can, so do it and that's that.

I see in the Greenville News that Ned Moore, from last year's Clemson Championship team, has sewed up the job in left field for the Augusta Tigers of the South Atlantic League. In recent exhibition games with the Baltimore Orioles Ned hit better than .500. The Augusta management thinks well of Moore, Here's to you Ned, Best of luck and may you soon be in the big leagues.

Now, the boys are wondering why no freshman baseball squad has been formed—well—here's the inside dope, why when and wherefore. Due to the protracted bad weather since the first of the year and its resultant delay in the work done in developing our athletic fields, it will not be possible for us to conduct Freshman baseball in the manner that this sport was conducted last year.

It is the plan to run Freshmen baseball on an inter-company basis. This will be entirely feasible as all Freshman are assigned to some company. At a later date a schedule of contests will be announced and various contests will be held while the Varsity team is away from the campus. After the coaching staff has had an opportunity to see the various players in action, it is possible that a squad may be selected and a few Freshman intercollegiate games be played toward the latter part of the season.

This practice is contemplated only for this year, as the Director has plans on foot whereby suitable athletic fields will be available for Freshman baseball next year. It is only due to the necessity of the re-arrangement of Riggs Field in order to provide for a sodded football field and a suitable baseball field, that this change in policy has been made necessary.

Captain "Ballyhoo's" boxing shows are getting better and better. He tells me that soon some of the bouts will be given in the afternoon due to the great number of bouts left on the schedule.

And now I'll tell you just one more thing. I'm holding in reserve one of the peachiest All Time All Clemson football selections that you ever cast an eye on. Watch for it and several other reminders of the old days in next week's issue. Bidding the old L. C. Smith a long sought rest—that is all.

## INTRAMURAL BOXERS STAGE TEN BOUTS

### Number of Contestants Cut Down Considerably

The field of contestants was narrowed down considerably in the intramural boxing eliminations here Friday night when ten more men were forced out of the running—three by technical knockouts. Several of the fights reminded us more of a track meet than a boxing match, but the majority of them provided pretty lively entertainment for the few spectators present.

In the battalion semi-finals the fights were as follows:

In the lightweight division Cochran received the decision over Camp. This battle had to go four rounds before a decision could be made.

In the welterweight class Settle won over Rowell on a technical K. O. in the first round. This bout promised to be rather interesting, and we hated to see it end so abruptly.

In the next match Fleming, middleweight, slugged his way to a victory over Carter, winning on a technical K. O. in the second round. This fight was a hit-as-hit can affair, with the victory going to the hardest hitter.

Ridleyhuber and Cohen, welterweights, next stepped into the padded arena, and gave the onlookers an eyeful of scientific boxing. Cohen won the decision by keeping his head up, and Ridleyhuber lost by keeping his down.

The next fray was also between welterweights, Cannon and Herlong being the combatants. Cannon gained a victory in the second round on a technical K. O. Herlong apparently was not in a fighting mood, for he didn't hit his opponent a sin-

gle time during the entire fight.

Rat Wood slugged out a decision over "Rot" Reeves in the light-heavy division.

In the first battalion final for the middleweight crown, Crutchfield barely gained a decision over Schumacher. This scrap was probably the closest of the night, and had to go for four rounds to a decision.

The last three bouts were the semi-final matches for the entire corps in the flyweight, featherweight, and lightweight divisions.

Seigler of the second battalion won in the flyweight class, outboxing Rat Cherry, first battalion favorite.

In the next match Carter, third battalion featherweight, gained a close decision over Sloan of the first battalion. This fracas went four rounds, and the winner had to be finally decided upon by the referee.

In the last bout of the evening, a lightweight match between Taggart, second battalion, and Geraty, first battalion, Taggart emerged winner. This boy Taggart will bear watching. He's a heady little boxer, and is not a bit timid about taking the aggressive in a fight.

## GEORGIA BULL DOGS DEFEAT CLEMSON MEN

### First Home Game Witnessed by Corps Lost to Georgians

In the opener of a two-game series here last Friday, the Georgia Bull Dogs defeated the Clemson nine 4 to 3. This was the third win for Georgia over the Tigers. It was the first game of the season for most of the cadets.

The game started with both teams, apparently equal. Amid the familiar drone and buzz from the stands, the umpire announced the batteries. Then for four innings the crowd watched the pitchers struggle for honors. It was in this inning that the "big boy" from Georgia slammed out a triple, his second of the game, to score Rothstein. Jacobson's single brought in Stecie. In the fifth, Herndon scored Chaffin. Faced with this three-run lead, the Tigers took matters in hand and proceeded to show just what they can do. "Mike" Zeigler cracked out a single. Johnny Justus drove a two-bagger to bring in Zeigler. Then "Foggy" Woodruff lifted a homer to left field, to even the score.

Chaffin walked in the seventh and scored on Herndon's single. The Bull Dogs held this lead through the rest of the game. Mahaffey replaced "Bud" Nivens as pitcher. Through two more innings the Tigers fought hard to score, but Parks' pitching was air-tight, and the game ended 4 to 3. Score:

Georgia -- 000 210 100—4 8 0  
Clemson -- 000 003 000—3 7 0

## CLEMSON SLUGGERS WIN FROM GEORGIA

### Clemson Team Victorious in Second Game

In a game marked with numerous errors, several hits, a homer, an injury, and other miscellany, Clemson's Tiger Team beat Georgia here Saturday by a 9 to 7 score. Rothstein, Georgian first sacker, was injured in the seventh inning while sliding into third. Martin replaced him. Although the Tigers made 9 runs, they garnered only three hits. The Bull Dogs hoisted eight hits. Georgia used three pitchers in the attempt to stop Clemson's victorious march.

Georgia opened things with a bang and piled up four runs in the first inning. Guyon's men retaliated in traditional style by scoring six men. Fry weakened and walked four men in a row. These men

counted on two singles and an error. Three more errors in the fourth inning enabled the Tigers to bring in three more runs. Justus was hitting them in fine style throughout the game. A run in the second sixth and ninth increased Georgia's score to 7 runs.

## MEDALS TO BE AWARDED TO TEN BEST SHOTS

### Week Marks Close of Rifle Shooting Season—Military Department to Give Medal to Ten High Men

This week brings to a close the small bore match shooting of the Clemson College Rifle Team. The twelve members of the team have been doing very consistent work all the year. Results of the individual members of the team are now being compiled. Medals to be awarded by the Military Department to the ten men having the highest score. Five silver and five bronze medals are to be awarded.

The members of the five-man team of Clemson: Cadet Major Clyburn, Hughes, Webb, Watson, and Rose are contending in the National Match for prizes offered by Mr. William Randolph Hearst. Every college in the country is eligible for admittance. Prizes are awarded to colleges in each section of the United States for "sectional" awards in addition to the prizes for the National winners.

It is hoped that at some time in the near future rifle shooting will be taken as a minor athletic sport. When one considers how much time each member of the team spends in order that Clemson might be represented among the other colleges of the world, it must be admitted that each member deserves commendation for his work.

We know a Scotch croquet player who has nine bow-legged children. He uses them for wickets.
